**To the Heads of Enterprises, Institutions,
and Organizations**

*Invitation to the Conference on the Restoration
and Development of Bridges*

State Enterprise “National Institute for Development Infrastructure” invites the heads of enterprises, sectoral specialists, and all interested parties to participate in the VI (Sixth) International Scientific and Practical Conference named after P.M. Koval, “Restoration and Development of Bridges: Challenges, Trends, Innovations” (hereinafter — the Conference), which will be held on 9–11 September 2026 in Ivano-Frankivsk region, Ukraine. For security reasons, the exact venue will be communicated only to registered participants.

The Conference is organized with the support of the State Agency for Restoration and Infrastructure Development of Ukraine.

Main Conference Topics:

- Issues of developing a strategy for the restoration and development of Ukraine’s bridge infrastructure;
- Current issues of operation, inspection, repair, reconstruction and construction of bridges;
- Regulatory support for design, operation, testing, monitoring and restoration of transport structures;
- Modern methods for assessing the technical condition and load-bearing capacity of bridges;
- Bridge condition monitoring systems and the use of real-time data;
- Digitization of the bridge sector, information and analytical systems, BIM and digital twins;
- Application of artificial intelligence, laser scanning, UAVs, sensor systems and non-destructive testing methods;
- International experience in bridge asset management, maintenance planning and prioritization of restoration;
- Engineering solutions to enhance the resilience of bridges to military, climatic and operational impacts;
- Novel materials and technologies for repair, strengthening, protection and modernization of bridge structures;
- Practical case studies on the restoration, construction, testing and monitoring of transport structures;
- Engineering solutions to enhance the resilience of bridges to military, climatic and operational impacts;
- Innovative materials and technologies for repair, strengthening, protection and modernization of bridge structures;
